

WUNDERLICH LEG PROTECTION »VARIO«

259,50€

35400-201. A perfectly designed width extension for the fairing that sustainably improves touring comfort and effectively protects the legs and feet against wind, moisture and cold. Cold air flows and upward rising turbulences that occur beneath the fairing are now effectively cancelled out.

Our test rides shows that this width is optimal for the K 1600 B. The contour follows the fairing design perfectly and this extension is our crystal clear upgrade for the new K design. The clear design supports the K's claim to being probably one of the best tourers that now combines an excellent, agile suspension with the protection of a super tourer.

The extensions can be folded away on hot days, allowing the cooling riding wind through unhindered. Thus even long tours become a real pleasure.

The facts:

- Perfect, additional wind and moisture protection
- Adjustable positioning, practical for hot days
- 3 mm thick, scratch and shatter-resistant acrylic plastic
- Incl. ABE and all installation materials
- Easy fitting

SKU: 35400-201
