Yamaha XT 1200 Z

The facts:

Can be operated using a ratchet and a 17 mm socket, or a round bar (using the side bores in tool body) or if needed in an emergency with a 17 mm spanner.

22 mm hexagon head for removing/fitting the front wheel spindle.

Bit holder with integrated magnet (holds the bit securely in the holder).

Square head for all 1/2 inch sockets (as ratchet substitute).

Very strong aluminium, blue anodised.

Note: Maximum torque of 100 NM/73 ft.-lbs can be applied to the hexagon (but not for the bit insert!)

SKU: 21300-000
