

WUNDERLICH TAIL SECTION S1000 XR WITHOUT TAIL LIGHT PREPARATIONS

280,30€

44900-102. This tail section places the uninviting licence plate holder of the XR including the indicator and tail light unit significantly closer to the tail. The lateral lines of the 1000 are left looking more coherent and more powerful. The scope of the delivery includes a licence plate holder + licence plate light. An opening for taking the original seat lock is included in the tail section.

The assembly is achievable with medium effort thanks to the assembly instructions supplied and doesn't require any deeper mechanic knowledge.

This conversion kit can alternatively be delivered including the modest "Fineliner" taillight, which gives the tail an additional refined and sporty note (item no. 44900-002).

Indicators and their brackets are not included – additionally you can order them by searching part number "38983-" in our web shop.
