

WUNDERLICH WINDSCREEN »EXTREME«

249,00€

20230-404. This windscreen is the absolute first choice for all riders looking for the perfect wind and weather protection for their F 850 GS.

Inspired by our tried and tested Marathon windscreen, we've once again perfected the protection primarily at the bottom around the windscreen. The extended flaps on the sides provided significantly less turbulent airflow especially around the body and the underarms.

The windscreen provides an optimum view of the front wheel. It is 5 mm thick and extremely stable, it doesn't wobble and offers a 100% visually clean view.

For models with a small windshield (short holder from factory).

The facts:

Perfect wind protection, even at high speed

No turbulence thanks to clear flow

Elimination of vibrations in helmet area

Optimum protection for hands, arms and upper body

Widened flaps at the bottom for additional comfort and protection

Simple assembly

Optimum aerodynamics

No water droplets on visor in rainy conditions (vacuum turbulence)

Very robust, visually clean and gas-resistant plastic

5 mm material thickness

Width 600 mm, height 460 mm

5 year warranty

With ABE

Available in four versions: Item no. 20230-304, transparent, for long original windscreen bracket

Item no. 20230-305, smoky, for long original windscreen bracket

Item no. 20230-404, transparent, for short original windscreen bracket

Item no. 20230-405, smoky, for short original windscreen bracket

Note: This windscreen is only suitable for models with the short windscreen mount. The short windscreen mount is the standard windscreen mount for the F 750 GS with 115 mm spacing to the screw holes. If your F has a long windscreen mount with 160 mm screw spacing (can be ordered when purchasing the F 750 GS), please order windscreen 20230-104 or 20230-304.
