

WUNDERLICH WINDSCREEN F 800 GS (-2012) »TOURING VARIO«

311,56€

25370-200. The Wunderlich Vario windscreen offers maximal wind protection that can be adjusted individually using a quick release. Sport, touring, summer, and offroad screen in one - the sensation for stress-free, individually adjustable driving pleasure.

The facts:

Steplessly adjustable from 410 mm to 470 mm

Thanks to another hole, height-adjustable up to 525 mm

Maximum protection for head, upper body and arms

Considerably widened at the bottom (transition to the protectors), optimum protection for hands and arms

Higher up, the wide flaps offer virtually turbulence-free protection for head and upper body

Quick and easy adjustment in height and angle using the quick release

Adjustable to almost all riders and riding habits

Incorporated flow channel: The inlet changes depending on the height set and counters turbulences with a calming countercurrent.

If required simply slide screen downwards and the field of view is already increased or the wind can flow freely to the rider

No water droplets on visor in rainy conditions (vacuum turbulence)

The design inspired by our ERGO touring screen for the R 1200 GS fills the gaps to the headlights and makes for a coherent and impressive appearance.

Highly robust, optically pure and petrol-resistant PMMA acrylic plastic

Easy and quick fitting

5 year warranty

The unique production process enables highly complex forms for perfect wind protection

Shaded in "shadow" at the bottom, whereby the protruding fittings are integrated into the design.

Clear field of vision
