The permanent enhancement for the yoke with a new structural design and more pronounced 3D effect thanks

to thicker Plascal coating. Our pads protect the sensitive fitting yoke from harm while resistant themselves to all sorts of adversities. Scratched up yokes can be restored with the pad without much effort.

Refined 3D Carbon Look with a fine 2.5 mm thick 3D Plascal coating, emphasising the three-dimensional look. Revolutionary technology, so far reserved only to premium bikes.
